### Empathy Map

An empathy map describes the user from four perspectives - what they say, think, do and feel - in relation to the problem the project addresses. It helps the team build a user-centred solution. The persona below represents the typical EduGenie learner.

|                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                            |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>SAYS</b></p> <ul style="list-style-type: none"> <li>"What is the largest ocean?" - I want a quick answer, not ten links.</li> <li>"Can someone explain this in simple words?"</li> <li>"Give me a short quiz so I can test myself."</li> <li>"I do not have time to read all these notes again."</li> </ul>         | <p><b>THINKS</b></p> <ul style="list-style-type: none"> <li>"There must be an easier way to understand this topic."</li> <li>"Am I ready for the exam, or am I fooling myself?"</li> <li>"Will the answer I find be reliable?"</li> <li>"Where should I start if I want to learn SQL properly?"</li> </ul> |
| <p><b>KARTHIK</b><br/> <i>(Second-year engineering student and self-learner)</i></p>                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                            |
| <p><b>DOES</b></p> <ul style="list-style-type: none"> <li>Searches the web and opens many tabs to find one answer.</li> <li>Copies passages from textbooks and websites into notes.</li> <li>Watches tutorial videos and skips between them.</li> <li>Looks for practice questions and solves them on his own.</li> </ul> | <p><b>FEELS</b></p> <ul style="list-style-type: none"> <li>Overwhelmed by too much scattered information.</li> <li>Anxious about exams and about not knowing his level.</li> <li>Frustrated when explanations are full of jargon.</li> <li>Motivated when he gets clear, instant feedback.</li> </ul>      |

**Key insight:** Karthik needs quick, clear and trustworthy help in one place - answers, simple explanations, practice questions, short summaries and a learning roadmap - which is exactly what EduGenie provides.
